Industrial | Commercial | Residential

Company Overview

Established in 2011, the company has a proven track record in delivering projects, large and small, on time and within budget. Our work predominantly covers the south east of England but we have undertaken projects in the North of England and Wales.

We are a scaffolding company undertaking projects for various clients from developers, new build commercial projects, housing associations as well as both public and private sector.

As specialist contractors in scaffolding we offer bespoke services to clients needs, this can vary from fine brick restoration to demolition works. We are capable of starting from the planning stage to assist our clients, using our expertise in both design and programming.

Construction Activities Undertaken

- New build
- Traditional build
- Steel and timber frame
- Temporary works and shoring
- Residential works for extensions
- Temporary roofing
- Crash decks and Birdcages
- Scaffold staircases
- Scaffolding for restoration work including listed buildings
- Internal scaffolding
- Edge protection to fulfil working at height regulations (2005)
